- Does not bleach wood or fabrics.
- When used as directed Spray & Walk Away is safe for use where children and animals play and around plants and gardens.
- Bleach free
- Biodegradable
- Phosphate free
- No Caustic soda

## How To Use

Simply dilute the liquid with 4 parts of water to one part Spray & Walk Away and fill a pressure pump sprayer. The area must be thoroughly soaked to achieve the best results. Choosing the right weather is a big help, it needs to be dry enough that the roots are thirsty. The reason for this is the liquid is absorbed by the plant and then it works as a desiccant drying out the moss, lichen and other growth. No rain can be in the forecast for 12-18 hours after application. Over time, the organics will dry up and start to fall away helped by the wind and rain water. The solution is completely safe so there is no worry about it running off the edge of the roof on to the driveway. If there is planting beside the area treated, simply give it a wash with the hose to rinse the overspray of solution away.

This is not an instant cure. You won't spray it on one day and see results the next. Spray & Walk Away is a treatment. It may take up to four weeks to see any results. Don't give up, it is working. You will look up at some point and see the moss has turned yellow and then gradually it will disappear. The best part about this product is, you spray it on and walk away and let the product do the work for you.

Simple-Quick-No Fuss  
No Pressure Washing

## Sizes Available

Spray & Walk Away -3.78L

## Coverage Chart

Mix (1)part of Spray & Walk Away(3.78L) to 4 parts of water (15.12L). Makes19L. This will provide solution for coverage up to 2,000 sq.ft. of area to be cleaned. The important thing to remember is to make sure the plant life is well saturated so the roots absorb as much as possible.

## \*\*\*\*\*IMPORTANT\*\*\*\*\*

As with any chemical solution eye protection should be used. Be aware that staining will occur if solution comes in contact with clothing. Old clothes and rubber boots are advised.

## Attention

Spray & Walk Away is not the same product as the Ready to Use Outdoor Cleaner product in the container with the red label. Spray & Walk Away is used for treating the effects of moss, mould and lichen etc. on roofs, brick and other areas that don't require a quick clean.
